

# Vacuum thermoforming machines

## **Technical data:**

**Maximum vacuum power:** 22,66 Kpa  
**Round plates diameter:** from 120 to 134 mm.  
**Square plate side size:** from 118 to 130 mm.  
**Plate thickness:** from 0 to 4 mm.  
**Noise:** 90 dB  
**Weight:** Kg. 4,15  
**Size:** cm. 24x27x19  
**Power:** 1.400 W

## **PLASTVAC P7 1-year warranty - Certification**

*Vacuum molding machine, very easy-to-use and with a featured design.*

*A powerful engine automatically generates the vacuum while printing.*

*Plastvac P7 requires no special installation, but simply plug it to the power supply.*

*Equipped with a universal adapter for round or square plates.*

*Carbon fiber resistance: uniform heating of the disc.*

*Vacuum automatic starting.*

*Rotating disc holder: it allows to heat both sides of the plate.*

*Model holder with plane positioning or with basket with balls.*

*Rotating disc holder: it allows to heat both sides of the disc, for thickness over 3 mm*

*Carbon fiber resistance, faster heating*
